EMMANUEL CHINEMEZU CHIBOKA

Engineer | Software Development · Systems & Operations · Process Improvement

Lagos, Nigeria | 09169684063 | chibokaxavier@gmail.com | github.com/chibokaxavier

Professional Summary

Versatile engineer with 3+ years of experience delivering technology solutions across real estate, banking and fintech, backed by a B.Eng. in Metallurgical and Materials Engineering. Skilled at building and improving systems, automating manual processes and turning business requirements into working products. Works well across teams (product, design, QA and engineering) and brings a structured, analytical approach to problem-solving, quality and safety. Comfortable adapting quickly to new tools, industries and responsibilities.

Core Skills

- **Technical:** TypeScript, JavaScript, Python, SQL; React, Next.js, Node.js, Express; MongoDB, Prisma, Firebase
- **Systems & Operations:** Process automation, system optimization, deployment and release management, performance troubleshooting, root cause analysis
- **Quality & Safety:** Quality assurance, technical documentation, HSE practices, preventive maintenance
- **Tools:** Git, Postman, Vercel, Microsoft Office (advanced Excel for data modeling, Word, PowerPoint)
- **Professional:** Cross-functional collaboration, stakeholder communication, project coordination, attention to detail, fast learner

Professional Experience

Software Engineer — Locate Rems

Jan 2025 – Jun 2026

- Built the full frontend architecture for a real estate management platform from the ground up.

- Delivered fast, responsive interfaces using a modular design that sped up the rollout of new features.
- Integrated complex APIs and managed data flows to keep the system accurate and in sync for users.
- Supported property listings, multi-step user workflows and real-time updates through structured state management.
- Worked closely with backend engineers and product teams to align technical delivery with business and launch goals.

Project Engineer / Software Engineer (Contract) — Bloocode Technologies

Jun 2024 – Dec 2024

- Built a Loan Management System for a top-tier Nigerian bank, automating manual loan workflows and improving approval efficiency.
- Translated complex business rules and user requirements into reliable, easy-to-use system features.
- Delivered accessible interfaces that worked consistently across devices and browsers.
- Reduced redundant network calls and improved system responsiveness through efficient data caching.
- Collaborated with designers and backend engineers to deliver data-driven features aligned with business logic.

Software Engineer Intern — 02 Hero Tech

Jun 2023 – Dec 2023

- Helped take a marketplace platform connecting users with verified service providers from concept to production-ready MVP.
- Built reusable components that improved design consistency and development speed.
- Implemented secure login, user sessions and access controls, plus core features for services, bookings and user profiles.

Engineering Intern (SIWES) — Studio Press Nigeria (SPN)

May 2023 – Oct 2023

- Assisted in troubleshooting and repairing industrial machinery to minimize production downtime.
- Performed welding and repair of industrial tanks and components to required safety and structural standards.
- Took part in manufacturing custom spare parts, tools and trolley tanks to support factory operations.
- Carried out routine inspections and preventive maintenance on heavy-duty equipment.

Key Projects

Kriapay – Cross-Border Payment Platform (kriapay.com)

- Built and deployed a secure, low-cost platform for currency exchange and transfers between Nigeria and Sierra Leone.
- Cut average transaction processing time by over 20% through backend optimization and bottleneck analysis.
- Reduced bounce rate by 35% by optimizing the platform for mobile users.
- Automated internal deployment pipelines, reducing release time by 40%.

TechTrail – Learning Management System (techtraill.vercel.app)

- Built a full-stack learning platform where users sign up, enroll in paid courses and track progress, with secure authentication.

Corrosion Research (Final Year Project)

- Investigated *Ficus thonningii* leaf extract as a green corrosion inhibitor on mild steel in acidic media, through extensive laboratory testing.

Open-Source Contributor — OnlyDust & Drips

- Contribute features and bug fixes to open-source projects and take part in code reviews with international developers.

Education

Bachelor of Engineering (B.Eng.), Metallurgical and Materials Engineering

University of Nigeria, Nsukka | 2018 – 2024

Certifications

- Health, Safety and Environment (HSE) – Level 1
